INTERNATIONAL JOURNAL OF PLASTICITY

Volume 6, Number 1 1990

CONTENTS

G. Maier **G. Novati**	1	Extremum theorems for finite-step backward-difference analysis of elastic-plastic nonlinearly hardening solids
W. Szczepiński	11	Mechanics of ductile fracture treated as a problem of the theory of plasticity
M. Omar Faruque **C.J. Chang**	29	A constitutive model for pressure sensitive materials with particular reference to plain concrete
K.W. Neale **L.S. Tóth** **J.J. Jonas**	45	Large strain shear and torsion of rate-sensitive FCC polycrystals
Leone Corradi **Francesco Genna**	63	Kinematic extremum theorems for holonomic plasticity
L.S. Tóth **J.J. Jonas** **P. Gilormini** **B. Bacroix**	83	Length changes during free end torsion: A rate sensitive analysis
N. Rohleder **F.G. Kollmann**	109	Creep experiments for parameter identification of the stochastic model of Steck with the powder metallurgical alloy AlMn10
	123	Announcements and call for papers

Volume 6, Number 2 1990

CONTENTS

R.C. Batra **C.H. Kim**	127	Adiabatic shear banding in elastic-viscoplastic nonpolar and dipolar materials
J. Pastor **S. Turgeman** **J.P. Boehler**	143	Solution of anisotropic plasticity problems by using associated isotropic problems

Y. Toi
S.N. Atluri 169 Finite element analysis of static and dynamic fracture of brittle microcracking solids—Part 1: Formulation and simple numerical examples

Gunther Hartmann 189 Comparison of the uniaxial behavior of the inelastic constitutive models of Miller and Walker by numerical experiments

Han C. Wu
Paul T. Wang
W.F. Pan
Z.Y. Xu 207 Cyclic stress–strain response of porous aluminum

R.C. Batra
De-Shin Liu 231 Adiabatic shear banding in dynamic plane strain compression of a viscolastic material

I Report of the NSF workshop on localized plastic instabilities and failure criteria edited by L. Anand, O. Dillon, T.A. Place and B.F. von Turkovich

---

Volume 6, Number 3 1990

CONTENTS

M. Sutcu
E. Krempl 247 A simplified orthotropic viscoplasticity theory based on overstress

Y. Toi
S.N. Atluri 263 Finite element analysis of static and dynamic fracture of brittle microcracking solids. Part 2: Stationary and growing macro-cracks under static loading

F. Havliček
J. Kratochvil
M. Tokuda
V. Lev 281 Finite element model of plastically deformed multicrystal

J.F. Bell 293 Material objectivity in an experimentally based incremental theory of large finite plastic strain

N. Ohno
M. Kawabata
J. Naganuma 315 Aging effects on monotonic, stress-paused, and alternating creep of type 304 stainless steel

H.S. Sellers
A.S. Douglas 329 A physical theory of finite plasticity from a theoretical perspective

K.C. Valanis 353 Back stress and Jaumann rates in finite plasticity

A. Franchi
Francesco Genna
Ferdinando Paterlini 369 Research note on quasi-convexity of the yield function and its relation to Drucker's postulate

---

Volume 6, Number 4 1990

CONTENTS

D.M. Wood
J. Graham 377 Anisotropic elasticity and yielding of a natural plastic clay

Y. Toi
S.N. Atluri 389 Finite element analysis of static and dynamic fracture of brittle microcracking solids. Part 3: Stationary and rapidly propagating cracks under dynamic loading

J.R. Klepaczko 415 Behavior of rock-like materials at high strain rates in compression

J. Gross-Weege 433 A unified formulation of statical shakedown criteria for geometrically nonlinear problems

Z.G. Zhu
G.J. Weng 449 A local theory for the calculation of overall creep strain of particle-reinforced composites

J. Aboudi 471 Micromechanical prediction of initial and subsequent yield surfaces of metal matrix composites

A.S. Khan
X. Wang 485 An experimental study of large finite plastic deformation in annealed 1100 aluminum during proportional and nonproportional biaxial compression

Announcements

I Eighteenth International Congress of Theoretical and Applied Mechanics

II First European Solid Mechanics Conference

Volume 6, Number 5 1990

CONTENTS

Y. Combres **C. Levaillant**	505	Superplasticity of two-phased alloys: Qualitative and quantitative approach
Y.K. Lee	521	Analysis of finite elastoplastic deformation using a new finite element method
G. Maier **G. Novati**	551	Dynamic shakedown and bounding theory for a class of nonlinear hardening discrete structural models
G.A. Maugin **M. Sabir**	573	Mechanical and magnetic hardening of ferromagnetic bodies: Influence of residual stresses and applications to nondestructive testing
T. Sakaki **K. Ohnuma** **K. Sugimoto** **Y. Ohtakara**	591	Plastic anisotropy of dual-phase steels
H. Takahashi **K. Ito** **M. Goya**	615	Directional dependence of plastic strain-rate vector on stress-rate vector: Numerical experiments based on the Lin's polycrystal model
		Book Review
C.W. Bert	633	*Continuum Mechanics and Its Applications*, edited by G.A.C. Graham and S.K. Malik
		Announcements
	I	Plasticity '91—The Third International Symposium on Plasticity and Its Current Applications

Volume 6, Number 6 1990

CONTENTS

Mahyar S. Dadkhah **Albert S. Kobayashi**	635	Further studies on the HRR field of a moving crack, an experimental analysis

D. Slavik **T.S. Cook**	651	A unified constitutive model for superalloys
James F. Bell	665	The role of radial motion in the dynamic plasticity of rods
G. Perrin **J.B. Leblond**	677	Analytical study of a hollow sphere made of plastic porous material and subjected to hydrostatic tension—application to some problems in ductile fracture of metals
G.G. Weber **A.M. Lush** **A. Zavaliangos** **L. Anand**	701	An objective time-integration procedure for isotropic rate-independent and rate-dependent elastic–plastic constitutive equations
	I	Volume Contents and Author Index
